Envisioning Diagnostics for the Future™

AX7000 TechScan™

Bilingual OBD I, OBD II Enhanced CAN Scan Tool

AX7000 TechScan™

NEW SD CARD FEATURE lets you customize your tool with additional upgrades as you need them. Why pay for features you don't need?

AX7000 TechScan offers unique customizable features in a scan tool. The AX7000 TechScan base unit includes specialized features such as on-screen graphing, LIVE sensor data and enhanced codes and definitions. It was developed with the ability to expand the tool coverage with optional SD card kits.

The new SD card kits will extend the tool features with coverage normally found in higher-priced professional tools or only available through expensive individual tools. No need to purchase separate tools for all repair needs. Purchase one tool and give tool owners the ability to choose the options they require most.

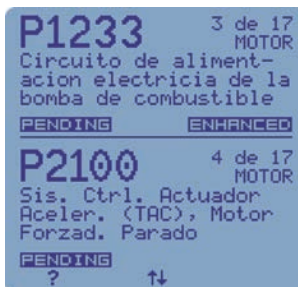

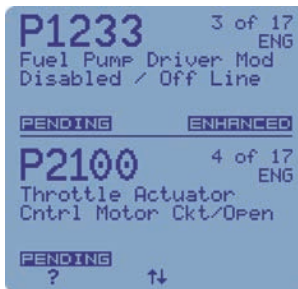

Initial offerings to choose from include ABS, Honda/Acura OBD I with enhanced OBD II datastream, Toyota/Lexus OBD I with enhanced OBD II datastream and Nissan OBD I. See inside for details.

Part Number: AX7000

New Features Include:

- SD card slot (allows memory expansion)
- GM, Ford and Chrysler enhanced OBD II datastream
- Supports enhanced OBD II code command on Toyota, Nissan & Honda
- True bi-directional capabilities
- 50% larger, backlit screen (128 x128 pixel size)
- Overmolding for better grip and more durable tool
- Dynamic language switching
- Print directly to USB printer
- Color-coded cables
- Ability to program more than one feature with user programmable hot key
